

NEUBAFIX Plus

PRODUCT DESCRIPTION

NEUBAFIX Plus has a definite detoxifying effect against different toxins. The uptake of the toxins depends on dose time and on the adsorption circumstances of the stomach and intestine tract. Toxic levels of many mycotoxins are often produced only under certain environmental conditions. Therefore fungal growth and production of mycotoxins should be prevented.

However the environmental conditions cannot always be controlled. In those circumstances it is important to reduce absorption of mycotoxins from the gastrointestinal tract through adding **NEUBAFIX Plus**.

NEUBAFIX Plus is a strong adsorbent able to inactivate toxins like Aflatoxin B1, Ochratoxin-A, Zearalenon. Furthermore **NEUBAFIX Plus** has a direct effect on the immune system because **NEUBAFIX Plus** takes part in biochemical reactions of the immune system.

COMPOSITION

NEUBAFIX Plus is a synergistic combination of a strong mineral adsorbent and immune stimulant.

ADVANTAGES

- The use of **NEUBAFIX Plus** has specific advantages:
- Absorbs toxin produced on the field and during storage;
- Assists the animal in maintaining high level of resistance;
- Feed additive for all animals;
- Improves animal performance, reduces mortality.

RECOMMENDED DOSAGE

Dosage per ton feed :	1-2 kg /ton
Starter diets:	2-4 kg /ton
Grower/ finisher diets:	1-2 kg /ton
Severe contaminated feed:	> 4 kg /ton

DELIVERY FORM

25 kg bags

STORAGE STABILITY

NEUBAFIX Plus should be stored in a dry, cool place in the dark
